## **Wetnose Animal Rescue website proposal**

### **Organization Overview:**

**Name:** Wetnose Animal Rescue Centre

### **1.Brief History:**

Wetnose Animal Rescue Centre is a registered Non-Profit Organization, NPO 033-447, located in Bronkhorstspuit, east of Pretoria. Established in 1999, Wetnose rescues, rehabilitates, and rehomes abused, abandoned, and neglected dogs and cats. The organization operates solely on public donations and volunteer support, receiving no government funding. The facility includes kennels, a cattery, and quarantine areas to house an average of 150 animals at any time.

### **Mission statement:**

To rescue, rehabilitate, and rehome abused and abandoned animals while promoting responsible pet ownership and sterilization in Gauteng.

### **Vision statement:**

A community where no animal suffers from neglect, abuse, or homelessness, and every adoptable pet finds a safe, loving forever home.

### **Target audience:**

- Potential Adopters: Families and individuals in Gauteng seeking to adopt dogs or cats.
- Volunteers: Animal lovers aged 16+ are able to donate time for dog walking, kennel cleaning, and events.
- Donors/Sponsors: Individuals and corporates seeking to sponsor kennels, donate funds, food, or supplies. NPO status allows Section 18A tax certificates.
- Community: Local residents needing to report abuse/neglect cases or access sterilization education.

### **2.Website goals and objectives:**

- Generate qualified leads: Capture structured enquiries for adoptions, volunteering, and kennel sponsorships to reduce staff phone workload.

- Increase adoptions: Provide 24/7 access to the adoption process and requirements to increase successful placements.
- Recruit volunteers: Clearly present volunteer roles, hours, and application forms to grow the volunteer base.
- Drive donations: Make it easy for donors to view banking details, sponsor options, and the organization's NPO credibility.
- Provide valuable information: Publish visiting hours, location, and policies to reduce repetitive phone queries.

#### **Key Performance Indicators Performance (KPI's):**

| <b>KPI</b>                     | <b>Target – First 3 Months</b> | <b>Measurement Method</b>              |
|--------------------------------|--------------------------------|----------------------------------------|
| Total Enquiry Form Submissions | 50+                            | Count of submissions via enquiry.html  |
| Adoption Enquiries             | 20+                            | Filter form by “Adopt a Pet” type      |
| Volunteer Sign-ups             | 15+                            | Filter form by “Volunteer” type        |
| Reduction in Info Calls        | 30% decrease                   | Staff survey pre/post launch           |
| Page Reach                     | 1000+ unique visitors          | To be tracked in Part 3 with analytics |

### **3.Current website analysis:**

#### **Strengths:**

- The Facebook page provides frequent updates and photos of animals, building community engagement.
- Contact via Facebook Messenger and phone is free and familiar to existing supporters.

#### **Weaknesses:**

- No 24/7 information hub: Adoption processes, visiting hours, and banking details are buried in Facebook posts and lost in the timeline.
- Inefficient lead capture: All enquiries come via unstructured Messenger chats or phone calls, creating high admin load for staff.
- Poor discoverability: People searching Google for “adopt dog Pretoria” will not find Wetnose easily without a website with SEO meta tags.

- No credibility signals: NPO number, POPIA policy, and structured info cannot be displayed professionally on Facebook.

#### **Areas for improvement based on the weaknesses identified:**

- Build a dedicated website with semantic HTML to improve Google search ranking.
- Implement structured HTML5 forms to capture adoption/volunteer/sponsor leads in a standard format.
- Create permanent pages for Contact, Services, and About to reduce phone calls by asking for basic info.
- Display NPO 033-447, physical address, and Google Maps embed to build trust and verify legitimacy

#### **4. Proposed Website Features and Functionality:**

- **Homepage index.html:** Hero introduction to mission, 3x clear calls-to-action linking to Adopt, Volunteer, Sponsor sections on services.html. Functionality: Immediate clarity of purpose and next steps.
- **About Us about.html:** Sections for History, Mission/Vision, and Team Members. Functionality: Builds trust and transparency per brief requirements.
- **Services Page services.html:** Detailed sections for Adoptions, Volunteering, and Sponsor Kennel. Each section includes a process overview and anchor link to enquiry.html. Functionality: Educates users before they enquire, improving lead quality.
- **Contact Page contact.html:** Two locations: Physical Address with Google Maps embed + Postal Address. General contact form with HTML5 validation. Social media text links to Facebook, Twitter/X, YouTube, Instagram, TikTok. Functionality: Meets “more than 1 location” and “contact form” rules while providing multiple contact channels.
- **Enquiry Page enquiry.html:** NPO-specific HTML5 form with dropdown for Enquiry Type: Adopt a Pet, Volunteer, Sponsor a Kennel, General Donation. Uses required, type="email", type="tel" with SA pattern, <fieldset>, and POPIA consent checkbox. Functionality: Captures structured, validated leads for core NPO functions.
- **Global Navigation:** Header with nav linking all 5 pages. Functionality: Ensures users can reach every page from every page per 5.4 rubric.

- **Footer:** Consistent NPO 033-447 number and key links. Functionality: Reinforces credibility on every page.

## 5.Design and User Experience:

- -The design aesthetic for Part 1 is content-first and accessible. Since Part 1 is HTML only, visual branding will be implemented in Part 2 with CSS. The HTML structure is built to support a compassionate, trustworthy, and clean brand identity. Use of semantic tags like <main> , <header> and <address> ensures the site is screen-reader friendly and logically organized.
- **Color Scheme:** [Proposed Color Palette]Part 2 Implementation Plan:
- **Primary:** Warm Green #4A7C59 – Represents hope, nature, and animal welfare. To be used for headings and CTAs.
- **Secondary:** Soft Brown #8B6F47 – Represents earth, trust, and the kennel environment. To be used for accents and footers.
- **Accent:** Friendly Orange #E67E22 – Represents warmth and calls-to-action like “Adopt Now”.
- **Neutrals:** Off-White #FDFD for backgrounds, Charcoal #333333 for body text to ensure WCAG readability.
- **Part 1:** No colors applied. Color scheme is documented here for implementation in Part 2 using external CSS.
- Design and User Experience:Discuss the overall design aesthetic and branding, highlighting the following:The design aesthetic for Part 1 is content-first and accessible. Since Part 1 is HTML only, visual branding will be implemented in Part 2 with CSS. The HTML structure is built to support a compassionate, trustworthy, and clean brand identity. Use of semantic tags like <article> and <address> ensures the site is screen-reader friendly and logically organised. Colour Scheme: [Proposed Colour Palette]
- **Typography – Part 2 Implementation Plan:**
- 1.) Headings: Montserrat, sans-serif – Modern, friendly, professional for NPO.
- 2.) Body: Open Sans, sans-serif – Excellent readability at 16px base size.

- Part 1: Browser default fonts only. Layout and Design – Overall Design Approach:
- 1.) Mobile-First: Layout stacks vertically for SA mobile users (Stats SA, 2024).
- 2.) Content-First: “Adopt, Volunteer, Sponsor” actions placed high on homepage.
- 3.) Action-Oriented: Every page ends with link to enquiry.html
- 4.) Trust Signals: NPO 033-447, address, and POPIA compliance in footer of every page.

#### **User experience considerations:**

- **Navigation:** Global <nav> with 5 links prevents overwhelming.
- **Forms:** <label> tags linked to every <input> with required attributes to reduce errors.
- **Performance:** No images in Part 1 ensures <1s load time on slow connections.
- **Accessibility:** Semantic HTML and planned high-contrast colors meet WCAG 2.1.

#### **Wireframes**

Sitemap:

WEBSITE STRUCTURE - Wetnose Animal Rescue Centre

# Wetnose Sitemap:

This Website sitemap shows hierarchical relationships. All pages are accessible from global navigation in the header. Services page links to Enquiry page via CTA buttons, meeting the brief for NPO volunteer/sponsor enquiries.

6.Domain Name: wetnoseanimalrescue.org.za recommended. .org.za signals NPO status to SA donors.

2.) Hosting Requirements: Shared Linux hosting with 99.9% uptime, SSL certificate for HTTPS, 5GB storage. Must support static HTML/CSS/JS. Afrihost or Xneelo are local, POPIA-compliant options.

3.) Programming Languages and Frameworks:

- Part 1: HTML5 – Structure, semantic tags, native form validation. No frameworks.
- Part 2: CSS3 – External style.css for all styling and responsiveness. No Bootstrap.
- Part 3: JavaScript (ES6) – External script.js for interactivity. No jQuery.
- Other: GitHub for version control, W3C Validator for testing, Google Forms for temporary Part 1 data capture.

| 7.Milestone                            | Deliverable                                 | Due date                    |
|----------------------------------------|---------------------------------------------|-----------------------------|
| Par1 :Building the foundation          | 5 HTML pages, ReadME,Proposal,Git Repo      | 25 March 2026-18 April 2026 |
| Part 1: Submission of Built foundation | 5HTML pages,README,proposal,Github repo,Zip | 18-20 April 2026            |

## 8.Budget:

| Item         | Realistic Cost(ZAR)         | Justification                        |
|--------------|-----------------------------|--------------------------------------|
| Domain Name  | R150 / year                 | .org.za from local registrar         |
| Web Hosting  | R99 / month = R1,188 / year | Shared hosting with SSL included     |
| Development  | R0 for POE                  | Real-world: R12,000–R18,000 once-off |
| Stock Images | R0                          | CC0 images + real Wetnose photos     |
| Maintenance  | R500 / year                 | Domain + hosting renewal             |
| Total Year 1 | R1,838                      | Excludes development cost            |
|              |                             |                                      |
